of Life Sciences
and Technologies

P.S. The owls moved in with a little help
from AI (OpenAI image model).

Building Strong Foundations for RDM in Latvia

The LBTU team's achievements
during the project

From zero to hero (almost)

Funded by
the European Union
NextGenerationEU

Project «Support for implementing Open Science, developing solutions for shared use of
research data, and participation in the EOSC» (Project No 2.1.3.1.i.0/2/23/1/CFLA/002)

01

Latvia University
of Life Sciences
and Technologies

Our starting point

Limited awareness

No clear institutional framework

Fragmented practices

P.S. The owls moved in with a little help from AI (OpenAI image model).

What we had to understand first

RDM is more than repository work.

Research data lifecycle

FAIR principles

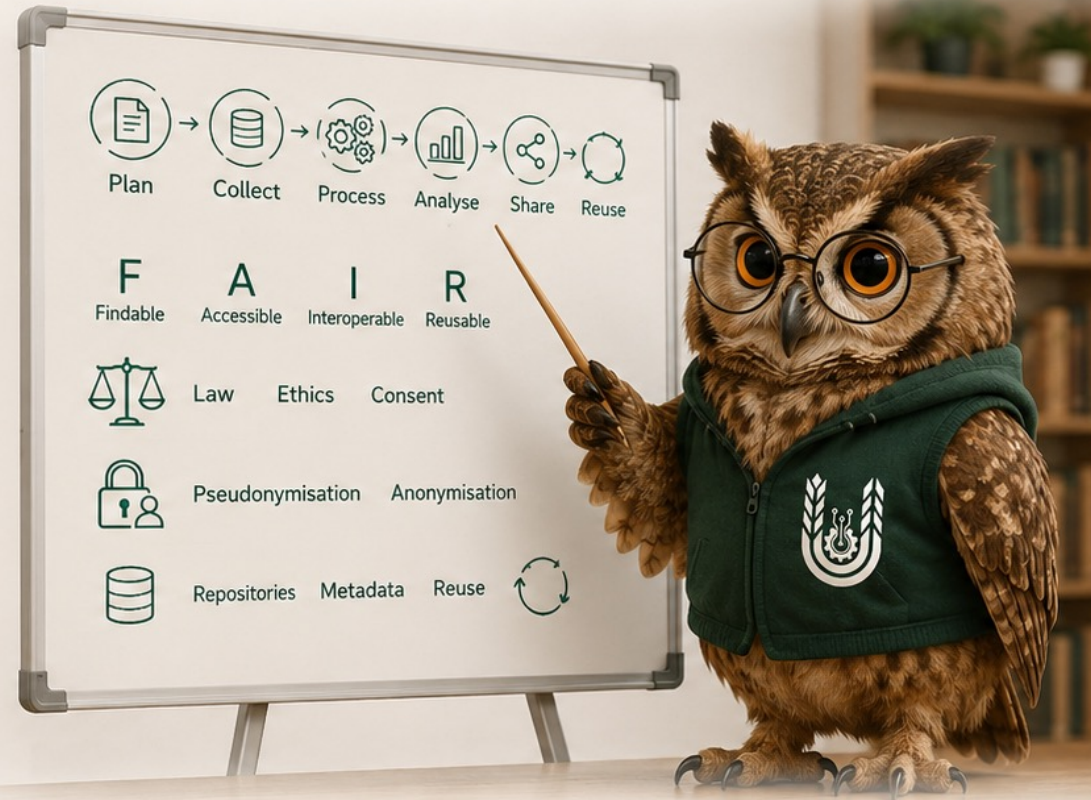

Legal and ethical boundaries

Sensitive data and anonymisation

Repositories, metadata and reuse

Building the rules of the game

Policies & regulations

-  Open Science Policy
-  RDM Guidelines
-  AI Guidelines
-  AI use procedure

From documents to practice

Policies were translated into practical workflows

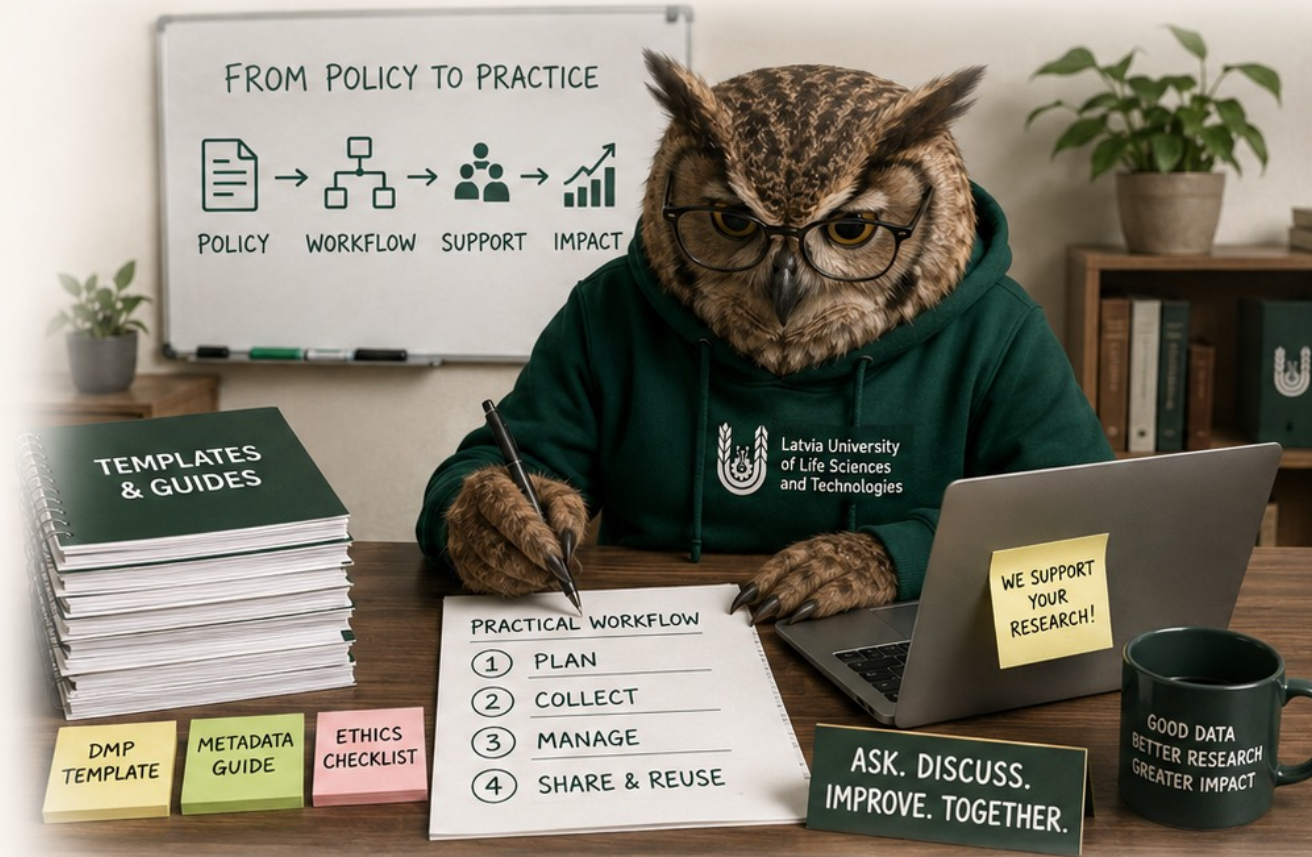

Templates and guidance materials were prepared

Researchers received direct support

RDM became part of teaching and consultation practice
